

# PROGRESSION THROUGH CALCULATIONS FOR MULTIPLICATION

## MENTAL CALCULATIONS

(ongoing)

These are a **selection** of mental calculation strategies:

### **Doubling and halving**

Applying the knowledge of doubles and halves to known facts.

e.g.  $8 \times 4$  is double  $4 \times 4$

### **Using multiplication facts**

*Tables should be taught everyday from Y2 onwards, either as part of the mental oral starter or other times as appropriate within the day.*

Year 2      2 times table  
              10 times table  
              Begin to know the 5 times table

Year 3      2 times table  
              5 times table  
              10 times table  
              Begin to know the 3 and 4 times tables

Year 4      2 times table  
              3 times table  
              4 times table  
              5 times table  
              10 times table  
              Begin to know 6, 7, 8 and 9 times tables

Year 5 & 6    Know by heart all multiplication facts up to  $10 \times 10$

### **Using and applying division facts**

Children should be able to utilise their tables knowledge to derive other facts.

e.g. If I know  $3 \times 7 = 21$ , what else do I know?

$30 \times 7 = 210$ ,  $300 \times 7 = 2100$ ,  $3000 \times 7 = 21\ 000$ ,  $0.3 \times 7 = 2.1$  etc

### **Use closely related facts already known**

$$\begin{aligned} 13 \times 11 &= (13 \times 10) + (13 \times 1) \\ &= 130 + 13 \\ &= 143 \end{aligned}$$

### **Multiplying by 10 or 100**

Knowing that the effect of multiplying by 10 is a shift in the digits one place to the left.  
Knowing that the effect of multiplying by 100 is a shift in the digits two places to the left.

### **Partitioning**

$$\begin{aligned}23 \times 4 &= (20 \times 4) + (3 \times 4) \\ &= 80 + 12 \\ &= 102\end{aligned}$$

### **Use of factors**

$$8 \times 12 = 8 \times 4 \times 3$$

*MANY MENTAL CALCULATION STRATEGIES WILL CONTINUE TO BE USED. THEY ARE NOT REPLACED BY WRITTEN METHODS.*

THE FOLLOWING ARE STANDARDS THAT WE EXPECT THE MAJORITY OF CHILDREN TO ACHIEVE.

### **YR and Y1**

Children will experience equal groups of objects and will count in 2s and 10s and begin to count in 5s. They will work on practical problem solving activities involving equal sets or groups.

### **Y2**

Children will develop their understanding of multiplication and use jottings to support calculation:

#### ✓ **Repeated addition**

3 times 5 is  $5 + 5 + 5 = 15$  or 3 lots of 5 or  $5 \times 3$

Repeated addition can be shown easily on a number line:

$$5 \times 3 = 5 + 5 + 5$$

and on a bead bar:

$$5 \times 3 = 5 + 5 + 5$$

✓ **Commutativity**

Children should know that  $3 \times 5$  has the same answer as  $5 \times 3$ . This can also be shown on the number line.

✓ **Arrays**

Children should be able to model a multiplication calculation using an array. This knowledge will support with the development of the grid method.

**y3**       $3 \times 5 = 15$

Children will continue to use:

✓ **Repeated addition**

4 times 6 is  $6 + 6 + 6 + 6 = 24$  or 4 lots of 6 or  $6 \times 4$

Children should use number lines or bead bars to support their understanding.

✓ **Arrays**

Children should be able to model a multiplication calculation using an array. This knowledge will support with the development of the grid method.

Children will also develop an understanding of

✓ **Scaling**

e.g. Find a ribbon that is 4 times as long as the blue ribbon

✓ **Using symbols to stand for unknown numbers to complete equations using inverse operations**

$\square \times 5 = 20$        $3 \times \triangle = 18$        $\square \times \circ = 32$

✓ **Partitioning**

$38 \times 5 = (30 \times 5) + (8 \times 5)$   
 $= 150 + 40$   
 $= 190$

## Y4

Children will continue to use arrays where appropriate leading into the grid method of multiplication.

x	10										⋮	4			
6	○	○	○	○	○	○	○	○	○	○	○	○	○	○	○
6	○	○	○	○	○	○	○	○	○	○	○	○	○	○	○
6	○	○	○	○	○	○	○	○	○	○	○	○	○	○	○
6	○	○	○	○	○	○	○	○	○	○	○	○	○	○	○
6	○	○	○	○	○	○	○	○	○	○	○	○	○	○	○

60                  24

$(6 \times 10) + (6 \times 4)$   
60 + 24  
84

### Grid method

#### TU × U

(Short multiplication - multiplication by a single digit)

$$23 \times 8$$

Children will approximate first

$23 \times 8$  is approximately  $25 \times 8 = 200$

x	20	3	
8	160	24	

$$\begin{array}{r} 160 \\ + 24 \\ \hline 184 \end{array}$$

## Y5

### Grid method

#### HTU × U

(Short multiplication - multiplication by a single digit)

$$346 \times 9$$

Children will approximate first  
 $346 \times 9$  is approximately  $350 \times 10 = 3500$

$$\begin{array}{r} \times \quad 300 \quad 40 \quad 6 \\ 9 \quad \boxed{2700} \quad \boxed{360} \quad \boxed{54} \\ \hline 2700 \\ + 360 \\ + \quad 54 \\ \hline \underline{\underline{3114}} \end{array}$$

### TU $\times$ TU

(Long multiplication - multiplication by more than a single digit)

$$72 \times 38$$

Children will approximate first  
 $72 \times 38$  is approximately  $70 \times 40 = 2800$

$$\begin{array}{r} \times \quad 70 \quad 2 \\ 30 \quad \boxed{2100} \quad \boxed{60} \\ 8 \quad \boxed{560} \quad \boxed{16} \\ \hline 2100 \\ + 560 \\ + \quad 60 \\ + \quad 16 \\ \hline \underline{\underline{2736}} \end{array}$$

*Using similar methods, they will be able to multiply decimals with one decimal place by a single digit number, approximating first. They should know that the decimal points line up under each other.*

e.g.  $4.9 \times 3$

Children will approximate first  
 $4.9 \times 3$  is approximately  $5 \times 3 = 15$

$$\begin{array}{r} \times \quad 4 \quad 0.9 \\ 3 \quad \boxed{12} \quad \boxed{2.7} \\ \hline 12 \\ + \quad 2.7 \\ \hline \underline{\underline{14.7}} \end{array}$$

## Y6

### ThHTU × U

(Short multiplication - multiplication by a single digit)

$$4346 \times 8$$

Children will approximate first

$4346 \times 8$  is approximately  $4346 \times 10 = 43460$

	x	4000	300	40	6	
8		32000	2400	320	48	

	32000
+	2400
+	320
+	48
	<u>34768</u>

When ready, simplify by

$$\begin{array}{r} 4346 \\ \times \quad 8 \\ \hline 34768 \end{array}$$

### HTU × TU

(Long multiplication - multiplication by more than a single digit)

$$372 \times 24$$

Children will approximate first

$372 \times 24$  is approximately  $400 \times 25 = 10000$

	x	300	70	2	
20		6000	1400	40	
4		1200	280	8	

	6000
+	1400
+	1200
+	280
+	40
+	8
	<u>8928</u>

When ready, simplify by

$$\begin{array}{r} 372 \\ \times \underline{24} \\ \hline 8928 \end{array}$$

*Using similar methods, they will be able to multiply decimals with up to two decimal places by a single digit number and then two digit numbers, approximating first. They should know that the decimal points line up under each other.*

*For example:*

$$4.92 \times 3$$

Children will approximate first

$$4.92 \times 3 \text{ is approximately } 5 \times 3 = 15$$

$$\begin{array}{r} \times \quad 0.9 \quad 0.02 \\ 3 \quad 4 \\ \hline 12 \quad 2.7 \quad 0.06 \end{array} \qquad \begin{array}{r} 12 \\ + 2.7 \\ + 0.06 \\ \hline 14.76 \end{array}$$

OR

$$\begin{array}{r} 4.92 \\ \times \underline{3} \\ \hline 14.76 \end{array}$$

+ - + - + - + - + - + - +

By the end of year 6, children will have a range of calculation methods, mental and written. Selection will depend upon the numbers involved.

Children should not be made to go onto the next stage if:

- 1) they are not ready.
- 2) they are not confident.
- 3)

Children should be encouraged to approximate their answers before calculating.

Children should be encouraged to consider if a mental calculation would be appropriate before using written methods.
